I. Introduction

I.1. Overview

This quarterly bulletin brings together crime and incident statistics from the Metropolitan Police Service (MPS) and British Transport Police (BTP) for Transport for London (TfL) services during Q1 2018/19 (April–June 2018). The bulletin provides crime statistics for the London Bus network, London Underground (LU), Docklands Light Railway (DLR), London Trams, TfL Rail and London Overground (LO) services.

The BTP is responsible for policing the rail network in London, including TfL’s LU, DLR, London Trams, TfL Rail and the LO services. Crime figures for LU, DLR, London Trams, TfL Rail and LO have been provided by the BTP. The BTP only deals with crime relating to the rail and Tram networks.

The MPS is responsible for policing the rest of London’s transport network, including the bus network. The figures reported in this bulletin for the bus network are based on official MPS figures for bus-related crime unless otherwise stated. There is no distinct category of “bus crime” in the MPS crime recording system. Recorded crime data is extracted from the MPS system using a complex query that searches all MPS crime for transport venue codes and those that have the word bus, bus stop, bus station and transport related words somewhere in the electronic case file. For this reason, some crimes that did not occur on the bus network will be included in the figures. This is different from the BTP as all crimes dealt with by the BTP and included on their crime recording system relate directly to the rail network.

Recorded crime figures relate to crime recorded by the MPS and BTP in the quarterly period. The figures do not include crimes that have not been reported to the police or those that the police decide not to record. Crime figures reported in this bulletin are consistent with Home Office counting rules and are subject to revision in future updates. At the end of the financial year, crime and passenger journey figures contained in this report will be adjusted to reflect the most accurate and up to date data available. Some of the figures and percentage changes published in this report may change. The adjusted figures will be published in the annual statistical bulletin (See 2017/2018 Crime Statistics Bulletin for recent annual statistics - available here <http://content.tfl.gov.uk/crime-statistics-bulletin-1718.pdf>).

2. Summary of Quarterly statistics

Public transport in London continues to be a relatively safe and low crime environment. Currently, almost eleven million passengers travel on the TfL's public transport services each day with very few of them ever experiencing or witnessing crime¹.

Overall, the level of pan-modal transport related crime² in Q1 2018/19 is 1.3% higher than Q1 2017/18 (102 more offences) and the rate of crime has increased to 7.7 crimes per million passenger journeys (from 7.6 in Q1 2017/18).

While levels of transport crime remain low, TfL and its transport policing partners remain focussed on those networks and crime types that have seen an increase.

Measures have been put in place to deal with the upward trend in violence / serious public order offences seen on some rail modes, most notably LU, DLR and the LO networks. The rise is largely due to an increase in low level violence, pushing and shoving, verbal disputes and threatening behaviour at busy commuter times when services are at peak capacity. Despite the upward trend in recorded incidents, overall there remain a very low number of offences. Concerted action is underway to address these offences. Some of the key measures include high visibility policing and targeted action against offenders combined with TfL's travel demand management and communications activities to encourage improved passenger behaviour, however, targeting violence/public order offences on transport networks remains challenging given their sporadic nature.

TfL continues to work with the BTP, City of London Police and the MPS on Project Guardian, a partnership initiative to increase the confidence in reporting sexual offences which occur on the London's public transport system, reduce the risk of becoming a victim, challenge unwelcome sexual behaviour and target offenders. In line with expectations, there has been an increase in the number of sexual offences reported to the police on the transport networks.

The BTP and MPS are working in partnership to tackle theft committed by organised crime groups. Specific police operations involve undertaking targeted patrols on sections of the LU network to identify known suspects and disrupt their activity.

These low levels of crime have been driven by a range of initiatives undertaken by TfL in partnership with the police forces in London. TfL's significant investment in transport policing and commitment to improving safety and security has ensured the system remains a low crime environment.

¹ Average daily figure based upon 2017/18 passenger journey information for the bus, LU, LO, DLR, Tram and TfL Rail networks.

² The pan-modal transport crime figure and rate is based on the aggregate crime and passenger journey figures for the bus, LU, DLR, Tram, LO and TfL Rail networks.

2.1. Quarterly crime results

Table I shows the number of recorded crimes and the rate of crime per million passenger journeys for Q1 2017/18 and Q1 2018/19³. The last column of the table shows the percentage change in the number of crimes between Q1 2017/18 and Q1 2018/19.

Table I

Bus	3,964	6.9	3,494	6.2	-11.9
London Underground	2,950	8.8	3,435	10.1	16.4
Docklands Light Railway	184	6.0	163	5.3	-11.4
London Overground	369	7.8	394	8.4	6.8
TfL Rail ⁴	114	10.4	172	13.7	50.1
London Trams	66	9.2	63	8.8	-4.5
Pan-Modal	7,619	7.6	7,721	7.7	1.3

³ Quarterly and monthly crime figures published in this bulletin are based on figures produced by the MPS and BTP at the end of each month as a snapshot of recorded crime. These figures are then aggregated to create quarterly values for this quarterly bulletin. These figures are not updated retrospectively until the end of the financial year when adjusted figures are published in the annual statistical bulletin.

⁴ The large volume and percentage rise on TfL Rail is partly due to the Q1 18/19 figures including offences reported upon the Paddington to Heathrow service introduced during May 2018.

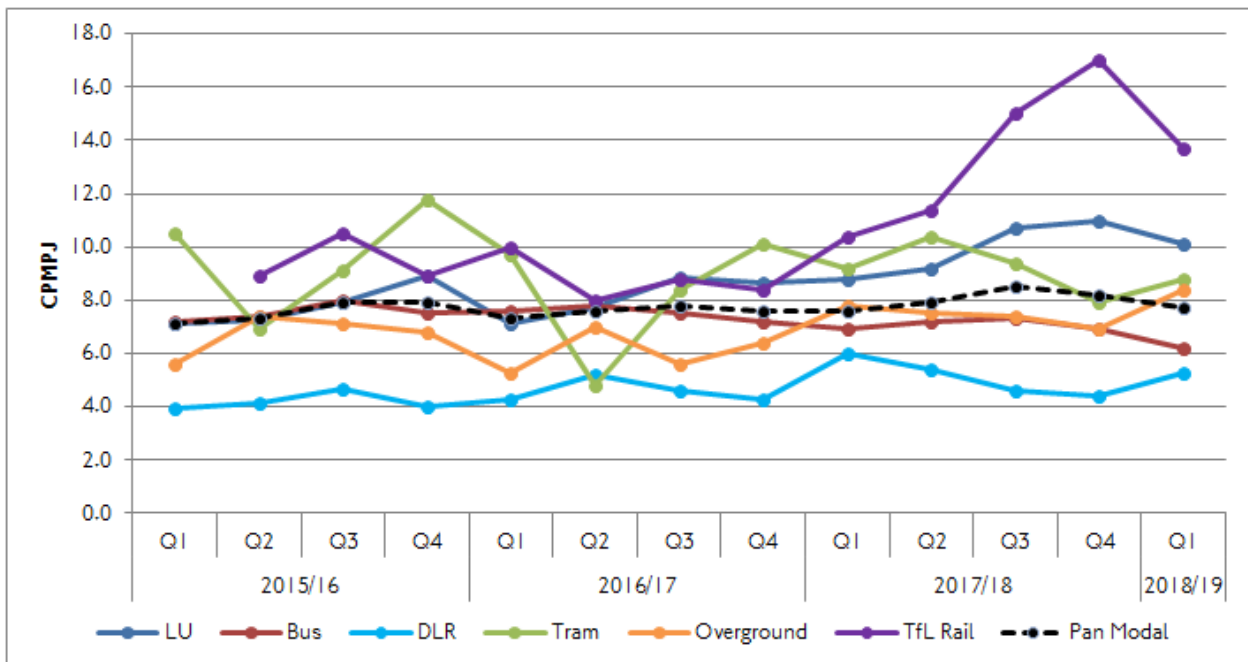

3. Monthly breakdown

Table 2 shows the total number of crimes for each month in Q1 2018/19. Chart 1 shows the crime rate on each mode and pan-modally since April 2015.

[‡] Q1 2018/19 figures onwards will include information relating to the introduction of the TfL Rail service between Paddington and Heathrow (replacing the previous Heathrow Connect service), making meaningful comparison with the previously reported figures difficult.

9. London Trams crime levels

Table 9 shows the breakdown of crime on the London Trams network by the major crime categories used by the BTP for Q1 2018/19. The table includes the number of crimes and makes comparisons with Q1 2017/18.

10. Hate Crime^{§§}

Tables 10 and 11 bring together police data from the MPS and BTP to provide a summary on the number of hate crimes recorded by the police for TfL's public transport services for Q1 2018/19. The tables include the number of crimes and makes comparisons with Q1 2017/18.

Hate crime is a subset of notifiable crime and accounted for 7.3 per cent of crime on TfL networks in Q1 2018/19. Hate crime offences are counted within the crime figures reported in the previous sections of the report.

Figures in this report include the number of offences, and how many motivating factors^{***} these covered. The sum of the hate motivating factors will exceed the total number of offences, as a hate crime can be marked as having more than one contributory factor.

§§ Hate crime is defined as any criminal offence which is perceived, by the victim or any other person, to be motivated by hostility or prejudice towards someone based on a personal characteristic.

*** The police can flag an offence as being motivated by one or more of the key strands of hate crime that are monitored by the Government – race, religion/faith, sexual orientation, disability or transgender identity. For example, a public order offence such as insulting and intimidating language offence can be flagged as both a race and religious hate crime if it was motivated by hostility towards those perceived or actual characteristics.
