Construction		
Visual Impact Description	Magnitude of Impact at Construction	Significance of Effect at Construction
Views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Low	Minor Adverse
Views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	High	Minor / Moderate Adverse
Views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	High	Major Adverse
Views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	High	Major Adverse
Views largely screened by hoarding in close proximity. Glimpsed views of construction plant and activities above. Light-spill during night time working hours from high-intensity lighting.	Medium	Moderate Adverse
Views of conveyors loading barges with excavated material moored at the wharves adjacent to the former Battersea Power Station.	Low	Minor / Moderate Adverse
Oblique views framed between buildings and above hoarding of construction activities within the site.	Low	Moderate Adverse
Views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	High	Major Adverse
Views framed between buildings and above hoarding of construction activities within the site.	Low	Minor Adverse
Views of construction activities barely perceptible through intervening fencing and above hoarding.	Negligible	Negligible Adverse
Views framed between buildings and above hoarding of construction activities within the site.	Low	Minor Adverse
Oblique views framed between buildings and above hoarding of construction activities within the site.	Low	Moderate Adverse
Views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	High	Major Adverse
Views largely screened by walls and hoarding in close proximity. Glimpsed views of construction plant and activities above. Light-spill during night time working hours from high-intensity lighting.	Low	Minor Adverse
Views framed between buildings and above hoarding of construction activities within the site.	Low	Minor Adverse

BR16	People working on No. 1-8 Brooks Court, Kirtling Street	Battersea Station	Low	Views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	High	Moderate Adverse
BR17	People working at warehouses on Battersea Park Road	Battersea Station	Low	Views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Low	Minor Adverse
BR18	Residents of No. 33 Battersea Park Road	Battersea Station	High	Views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Low	Moderate Adverse
BR19	People working at and visiting the Duchess Public House,	Battersea Station	Low	construction plant and activities above	High	Moderate Adverse
BR20	Residents of Chelsea Bridge Wharf	Battersea Station	High	Oblique views across railway structures and vacant Battersea Power Station site of construction plant and activities. Illuminated during night time working hours by high-intensity lighting.	Negligible	Minor / Moderate Adverse
BR21	People working at and visiting QVC building	Battersea Station	Low	Views across railway structures and vacant Battersea Power Station site of construction plant and activities. Illuminated during night time working hours by high-intensity lighting.	Low	Minor Adverse
HS01	Residents of Kennington Park House	Harmsworth Street	High	Views of site hoarding. Construction activities and equipment visible above. Significant	Medium	Major/ Moderate Adverse
HS02	Residents of No. 73-75 De Laune Street	Harmsworth Street	High	Views of site hoarding. Construction activities and equipment visible above. Significant.	High	Major Adverse
HS03	Road users and pedestrians on De Laune Street	Harmsworth Street	Low	Glimpsed views of site hoarding. Construction activities and equipment visible above. Not significant.	Low	Minor Adverse
HS04	Residents of No. 84-90 De Laune Street and 1-3 Kenning	Harmsworth Street	High	Glimpsed views of site hoarding. Construction activities and equipment visible above. Significant.	Low	Moderate Adverse
HS05	Residents of No. 6-11 De Laune Street and 12-22 Sharste	Harmsworth Street	High	Glimpsed views of site hoarding. Construction activities and equipment visible above. Significant.	Low	Moderate Adverse
HS06	Residents of No. 1-7 Sharsted Street	Harmsworth Street	High	Close-distance views of site hoarding. Construction activities and equipment visible above. Significant.	Medium	Moderate / Major Adverse
HS07	Road users and pedestrians on Harmsworth Street	Harmsworth Street	Low	Brief exposure to views of site hoarding. Construction activities and equipment visible above. Not significant.	Medium	Minor / Moderate Adverse
HS08	People working at and visiting No. 9 Harmsworth Street	Harmsworth Street	Low	Views towards application site hoarding. Construction activities and equipment visible above hoarding. Elevated views straight into worksite. Not significant.	Low	Minor Adverse
HS09	Residents of No. 1-8 Harmsworth Street	Harmsworth Street	High	Views towards application site hoarding. Construction activities and equipment visible above hoarding. Elevated views straight into worksite. Not Significant.	Low	Moderate Adverse
HS10	Residents of Harvard House, Doddington Grove	Harmsworth Street	High	Views towards application site hoarding. Construction activities and equipment visible above hoarding. Elevated views straight into worksite. Not significant.	Low	Moderate Adverse
HS11	Residents of No. 76-77 De Laune Street	Harmsworth Street	High	Close-distance views of site hoarding. Construction activities and equipment visible above hoarding. Elevated views straight into worksite. Significant.	Medium	Moderate / Major Adverse
HS12	Residents of No. 70-72 De Laune Street	Harmsworth Street	High	Close-distance views of site hoarding Construction activities and equipment visible above hoarding. Elevated views straight into worksite. Significant.	Medium	Moderate / Major Adverse
HS13	Residents of 90 De Laune Street	Harmsworth Street	High	Views of site hoarding. Construction activities and equipment visible above hoarding. Elevated views straight into worksite. Significant.	High	Major Adverse

HS14	Residents of No. 1-5 De Laune Street and 2-10 (even numbers) Harmsworth Street	Harmsworth Street	High	Views of site hoarding. Construction activities and equipment visible above hoarding. Elevated views straight into worksite. Significant.	High	Major Adverse
KG01	Users of Tesco supermarket, Kennington Lane	Kennington Green	Low	Views of the construction of the water tanks and wall adjacent to the Beefeater Gin building. Views of the head house construction site substantially screened by intervening fence and structures of the construction of the new head house opposite Kennington Green. Illuminated during night time working hours by high-intensity lighting.	Medium	Minor / Moderate Adverse
KG02	Residents of No. 251-261 Kennington Lane	Kennington Green	High	Views substantially screened by intervening fence and structures of the construction of the new head house opposite Kennington Green. Illuminated during night time working hours by high-intensity lighting.	Negligible	Negligible Adverse
KG03	Road users and pedestrians on Montford Place	Kennington Green	Low	Dynamic views partially screened by intervening fence and structures of the construction of the new head house opposite Kennington Green. Illuminated during night time working hours by high-intensity lighting.	Low	Minor Adverse
KG04	People working at the Beefeater Gin Distillery	Kennington Green	Low	Views of the demolition of existing structures at the corner of Montford Place. Views beyond of construction plant and activities above hoarding within Kennington Green. Illuminated during night time working hours by high-intensity lighting.	Medium	Minor / Moderate Adverse
KG05	Residents of Montford Place	Kennington Green	High	Views of the demolition of existing structures at the corner of Montford Place. Views along Montford Place and of construction plant and activities above hoarding within Kennington Green. Illuminated during night time working hours by high-intensity lighting.	Medium	Moderate / Major Adverse
KG06	Residents of No. 346 - 356 Kennington Road, Kennington	Kennington Green	High	Views of the demolition of existing structures at the corner of Montford Place. Views of construction plant and activities above hoarding within Kennington Green. Illuminated during night time working hours by high-intensity lighting.	High	Major Adverse
KG07	Residents of No. 362-366 Kennington Road	Kennington Green	High	Oblique views of the demolition of existing structures at the corner of Montford Place. Views of construction plant and activities above hoarding within Kennington Green. Illuminated during night time working hours by high-intensity lighting.	High	Major Adverse
KG08	People working at and visiting bars and restaurants at Kennington Green	Kennington Green	Low	Views of the demolition of existing structures at the corner of Montford Place. Views of construction plant and activities above hoarding within Kennington Green. Illuminated during night time working hours by high-intensity lighting.	High	Moderate Adverse
KG09	Residents of Sherwin House, Clayton Street	Kennington Green	High	Views of construction plant and activities above hoarding within Kennington Green. Illuminated during night time working hours by high-intensity lighting.	High	Major Adverse
KG10	Road users and pedestrians on Kennington Road	Kennington Green	Low	Dynamic views of the demolition of existing buildings and views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Medium	Minor / Moderate Adverse
KG11	People working at the Old Town Hall, Kennington Road	Kennington Green	Low	Views of construction plant and activities above hoarding within Kennington Green. Illuminated during night time working hours by high-intensity lighting.	Medium	Minor / Moderate Adverse
KG12	People working at and visiting commercial premises on Kennington Green	Kennington Green	Low	Views of the demolition of existing buildings and views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	High	Moderate Adverse
KG13	Residents of Hornby House, Kennington Road	Kennington Green	High	Views of construction plant and activities above hoarding within Kennington Green. Illuminated during night time working hours by high-intensity lighting.	Low	Moderate Adverse
KG14	Road users and pedestrians on Milverton Street	Kennington Green	Low	Dynamic views of construction plant and activities above hoarding within Kennington Green. Illuminated during night time working hours by high-intensity lighting.	Low	Minor Adverse
KG15	Residents of former Vauxhall Manor School	Kennington Green	High	Views of the demolition of existing buildings and views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	High	Major Adverse
KG16	People working at and visiting commercial premises on Kennington Green	Kennington Green	Low	Views of construction plant and activities above hoarding within Kennington Green. Illuminated during night time working hours by high-intensity lighting.	Low	Minor Adverse
KG17	Residents of flats above No. 2 Stannary Street and 405 Kennington Road	Kennington Green	High	Views of the demolition of existing buildings and views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Medium	Moderate / Major Adverse
KG18	People working at and visiting offices at No. 405 Kennington Road	Kennington Green	Low	Views of construction plant and activities above hoarding within Kennington Green. Illuminated during night time working hours by high-intensity lighting.	Low	Minor Adverse

KG19	Road users and pedestrians on Kennington Park Road	Kennington Green	Low	Views of construction plant and activities above hoarding within Kennington Green. Illuminated during night time working hours by high-intensity lighting.	Low	Minor Adverse
KG20	Residents of Imperial Court	Kennington Green	High	Views of the construction of the water tank and walls adjacent to the Beefeater Gin Distillery industrial buildings	Medium	Moderate / Major Adverse
KP01	People working at and visiting The Lodge, Kennington Pa	Kennington Park	Medium	Views of construction plant and activities partially screened by intervening vegetation and hoarding surrounding the site. Works illuminated during night time working hours by high-intensity lighting.	Medium	Moderate Adverse
KP02	Pedestrians on Kennington Park night walk	Kennington Park	Medium	Views of construction plant and activities partially screened by intervening vegetation and hoarding surrounding the site. Works illuminated during night time working hours by high-intensity lighting.	Medium	Moderate Adverse
KP03	Road users and pedestrians on A3 Kennington Park Road	Kennington Park	Low	Glimpsed, dynamic views of construction plant and activities partially screened by intervening vegetation and hoarding surrounding the site. Works illuminated during night time working hours by high-intensity lighting.	Low	Minor Adverse
KP04	Users of Kennington Park Cafe	Kennington Park	Medium	Views of construction plant and activities partially screened by intervening vegetation and hoarding surrounding the site. Works illuminated during night time working hours by high-intensity lighting.	Medium	Moderate Adverse
KP05	Users of Kennington Park	Kennington Park	Medium	Views of construction plant and activities partially screened by intervening vegetation and hoarding surrounding the site. Works illuminated during night time working hours by high-intensity lighting.	High	Moderate / Major Adverse
KP06	Residents of Kennington Park House, Kennington Park Pl	Kennington Park	High	Views of construction plant and activities partially screened by intervening vegetation and hoarding surrounding the site. Works illuminated during night time working hours by high-intensity lighting.	High	Major Adverse
KP07	Residents of No. 1-3 Kennington Park Place	Kennington Park	High	Views of construction plant and activities partially screened by intervening vegetation and hoarding surrounding the site. Works illuminated during night time working hours by high-intensity lighting.	High	Major Adverse
KP08	Users of Bishop's House Day Nursery, Kennington Park P	Kennington Park	Low	Views of construction plant and activities partially screened by intervening vegetation and hoarding surrounding the site. Works illuminated during night time working hours by high-intensity lighting.	High	Major Adverse
KP09	Residents of Conant House, St. Agnes Place	Kennington Park	High	Views of construction plant and activities substantially screened by intervening vegetation and hoarding surrounding the site. Works illuminated during night time working hours by high-intensity lighting.	Low	Moderate Adverse
KP10	Residents of No. 10-11 Kennington Park Place	Kennington Park	High	Views of the demolition of existing buildings and construction plant and activities partially screened by intervening vegetation and hoarding surrounding the site. Works illuminated during night time working hours by high-intensity lighting.	High	Major Adverse
KP11	Road users and pedestrians on Kennington Park Place	Kennington Park	Low	Dynamic, short-duration views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	High	Moderate Adverse
KP12	Road users and pedestrians on Royal Road	Kennington Park	Low	Dynamic, short-duration views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Medium	Minor / Moderate Adverse
KP13	Residents of No. 1-7 St. Agnes Place	Kennington Park	High	Views of the demolition of existing buildings and construction plant and activities partially screened by intervening vegetation and hoarding surrounding the site. Works illuminated during night time working hours by high-intensity lighting.	High	Major Adverse
KP14	Residents of No. 11-16 Kennington Park Place	Kennington Park	High	Views of the demolition of existing buildings and construction plant and activities partially screened by intervening vegetation and hoarding surrounding the site. Works illuminated during night time working hours by high-intensity lighting.	High	Major Adverse
KP15	Users of Kean House open space	Kennington Park	Medium	Glimpsed views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Low	Minor / Moderate Adverse
KP16	Residents of Kean House, Kennington Park Place	Kennington Park	High	Glimpsed views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Low	Moderate Adverse
NE01	Railway passengers - Vauxhall line	Nine Elms	Low	Dynamic, short-duration views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Low	Minor Adverse

NE02	Residents of Bramley Crescent	Nine Elms	High	Glimpsed views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Medium	Moderate / Major Adverse
NE03	Residents of Pascal Street	Nine Elms	High	Views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	High	Major Adverse
NE04	Road users and pedestrians on Pascal Street	Nine Elms	Low	Dynamic views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	High	Moderate Adverse
NE05	Residents of Charman House, Bramley Crescent	Nine Elms	High	Glimpsed views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Medium	Moderate / Major Adverse
NE06	Users of Sainsbury supermarket	Nine Elms	Low	Views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	High	Moderate Adverse
NE07	Residents of Lockyer House, A3036 Wandsworth Road	Nine Elms	High	Views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Medium	Moderate / Major Adverse
NE08	Residents of Temple Court, A3036 Wandsworth Road	Nine Elms	High	Glimpsed views construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Negligible	Minor / Moderate Adverse
NE09	Residents of Wilbraham House, A3036 Wandsworth Road	Nine Elms	High	Glimpsed views construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Low	Moderate Adverse
NE10	Residents of Wilbraham House, A3036 Wandsworth Road	Nine Elms	High	Views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Medium	Moderate / Major Adverse
NE11	Road users and pedestrians on A3036 Wandsworth Road	Nine Elms	Low	Dynamic, short-duration views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Medium	Minor / Moderate Adverse
NE12	Residents of Wilcox Road	Nine Elms	High	Glimpsed views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Medium	Moderate / Major Adverse
NE13	Residents of Edgar, David, Conrad and Basil Houses on A	Nine Elms	High	Views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	High	Major Adverse
NE14	Residents of Quinton House on Wyvil Road	Nine Elms	High	Views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Low	Moderate Adverse
NE15	Road users and pedestrians on Wilcox Road	Nine Elms	Low	Dynamic, short-duration views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Medium	Minor / Moderate Adverse
NE16	Residents of 41-43 Hemans Street	Nine Elms	High	Glimpsed views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Negligible	Minor / Moderate Adverse
NE17	People working at and visiting shops on Wilcox Road	Nine Elms	Low	Glimpsed views of the demolition of existing buildings and later, views of construction plant and activities above hoarding. Illuminated during night time working hours by high-intensity lighting.	Medium	Minor / Moderate Adverse
RS01	Residents of 5, 7 and 9 Ravensdon Street	Radcot Street	High	Close-distance views of site hoarding from lower floors. Construction activities and equipment would be visible above hoarding. Elevated views straight into worksite. Loss of 2 street trees would result in open views of construction site. Significant.	High	Major Adverse
RS02	Residents of Ravensdon Street and Methley Street - Rear elevations	Radcot Street	Medium	Glimpsed views of site hoarding from lower floors. Construction activities and equipment would be visible above hoarding. Elevated views straight into worksite. Loss of 2 street trees would result in open views of construction site. Significant.	Low	Minor / Moderate Adverse
RS03	Residents of Whiteacre Mews, Stannary Street and 1-3 Ravensdon Street	Radcot Street	High	Close-distance views of site hoarding from lower floors. Construction activities and equipment would be visible above hoarding. Elevated views straight into worksite. Loss of 2 street trees would result in open views of construction site. Significant.	Medium	Moderate / Major Adverse

RS04	Residents of 1-7 Radcot Street	Radcot Street	High	Close-distance views of site hoarding with construction operations, lorry and crane visible above the hoarding. Loss of 2 street trees would result in open views of construction site. Significant.	High	Major Adverse
RS05	Residents of Methley Street	Radcot Street	High	Close-distance views of site hoarding from lower floors. Construction activities and equipment would be visible above hoarding. Elevated views straight into worksite. Loss of 2 street trees would result in open views of construction site. Significant.	High	Major Adverse
RS06	Residents of 8-10 Radcot Street	Radcot Street	High	Close-distance views of site hoarding from lower floors. Construction activities and equipment would be visible above hoarding. Elevated views straight into worksite. Loss of 2 street trees would result in open views of construction site. Significant.	Medium	Moderate / Major Adverse
RS07	Residents of 11-23 (odd no's) Ravensdon Street	Radcot Street	High	Close-distance views of site hoarding from lower floors. Construction activities and equipment would be visible above hoarding. Elevated views straight into worksite. Loss of 1 street tree would result in open views of construction site. Significant.	High	Major Adverse
RS08	Pedestrians and road users of Stannary Street	Radcot Street	Low	Glimpsed views of site hoarding with construction operations, lorry and crane visible above. Significant.	Medium	Minor / Moderate Adverse

Comparison and Assessment

Kennington Park - Western side of park

Time 10/01/2013 – 14:32
 Lens Focal Length 24mm
 Lens Shift 5mm RF
 Image Direction 257°
 Height 1.60m
 Latitude 51° 29' 8.478" N
 Longitude 0° 6' 40.458" W

Existing View

This view is from a point close to the war memorial at the north-western corner of the Grade II registered Kennington Park. The foreground comprises the beginning of a sweeping path which extends eastwards into the background. The foreground also takes-in a grassed, dog exercise area enclosed by railings to the north and a low bow-top fence to the south. This open area is lined by trees to the north which filter views of the two- to three-storey Victorian villas which front Kennington Park Place, some of which are listed. The background of the view includes the tops of earlier listed Georgian townhouses and the Kennington Park Lodge. The latter is substantially screened by dense vegetation within the lodge garden and park. There are also glimpsed views of the 20th century Conant House filtered by mature evergreen trees within the park.

Comparison and Assessment

Kennington Park - Western side of park

Existing and Proposed

The foreground of this view would be returned to a grassed area enclosed by a low metal fence. Longer grass would be established along the northern boundary of Kennington Park, extending into the middle-ground. This boundary would be reinforced by an avenue of new London Plane (*Platanus x hispanica*) trees and railings to match the existing. The proposed head house building would fall into the background of the view. The building would be located further to the right than the existing Kennington Park Lodge, and the roofline swept back to reveal a more extensive view of the Grade II listed properties No.s 1-7 St. Agnes Place and their attached railings. Only the louvered west-facing façade of the head house building would be visible, above a dense massing of flowering trees and shrubs which would provide its setting.

Proposed View

Kennington Park – Kennington Park Place / St. Agnes Place

Time	10/01/2013 – 11:28
Lens Focal Length	24mm
Lens Shift	5mm RF
Image Direction	256°
Height	1.60m
Latitude	51° 29' 5.658" N
Longitude	0° 6' 22.098" W

Existing View

The foreground of this view is formed by the junction of Kennington Park Place and St. Agnes Place; residential streets are flanked by narrow pavements with granite kerbs. Kennington Park Lodge, an inter-war former park keeper's cottage, forms the focus of the view in the middle-ground. The modest two-storey house faces the corner of the street and is set within a garden enclosed by metal railings. Mature trees and shrubs form the background of the view, within the Grade II registered Kennington Park and to the rear of the lodge. The view to the west extends along Kennington Park Place as far as Kennington Park Road and takes-in the tree-lined northern boundary of Kennington Park.

Comparison and Assessment

Kennington Park – Kennington Park Place / St. Agnes Place

Existing and Proposed

The middle-ground of this view would be transformed by the proposed community building with the head house to the rear, in place of the existing Kennington Park Lodge. These new high quality buildings, which would be architecturally balanced and complementary in design, would form the focus of the view. Architectural details, such as the intricate green roof form, brick relief and large windows would be readily discernible. The view would be further enhanced by proposed flowering fruit trees, ornamental shrubs and climbing plants within the gardens surrounding the buildings. Plants have been selected to provide visual interest from the street throughout the year. Trees and shrubs within Kennington Park would form the background of the view, framing the proposed buildings. The northern boundary would also be reinforced by an avenue of new London Plane (*Platanus x hispanica*) trees and railings to match the existing.

Proposed View

Viewing Distance @A3: 300mm

Image Dimensions @A3 450x300mm
