Introduction

Background

The Bus User Survey is a research study commissioned by Transport for London to establish and understand the profile of London bus passengers. The survey also provides details of passenger travel behaviour, including the purpose of their journeys and modes of access and egress.

The key aim of the study was to provide market information on bus passengers' journeys in terms of demographics such as age, gender, ethnicity, employment status, purpose of journey and ticket used. The study was a repeat of previous surveys conducted in 1999, 2003 and 2008.

Research Objectives

The main research objectives of the 2014 survey, as stated in the project brief, were to:

1. Determine the profile of bus passengers who board buses at bus stops within the area bounded by the M25;
2. Identify access and egress modes (i.e. method of transport used before and after the bus element of their trip);
3. Identify the use of bus services and the frequency of use;
4. Determine differences in the profile of bus users by time of day (including nights) and day of week (including weekends).

Fieldwork: Key Facts and Figures

Fieldwork took place between 12 May and 27 July 2014.

The key facts of the fieldwork:

- 450 day shifts and 150 night shifts were sampled and allocated to fieldworkers.
- Day shifts lasted for three hours and night shifts lasted for five hours.
- Questionnaires were distributed by fieldworkers to all boarding passengers, and collected as they alighted the bus.
- A total of 89,794 bus passengers were approached and 68,470 questionnaires were accepted, resulting in an overall refusal rate of 23.7%.
- Of the 68,470 distributed, 64,829 were returned, yielding a return rate of 94.7%.
- The overall completion rate was 80.9% – 81.8% amongst day bus passengers and 77.4% amongst night bus passengers.

Analysis: Key Facts and Figures

The key facts of the analysis:

- To ensure the data was of the highest quality, a number of logic rules were applied, which left 52,468 usable records (rules outlined in Analytical Report).
- Of the remaining 52,468 records, a total of 4,314 were under the age of 16, leaving 48,154 eligible questionnaires to be analysed after Q1 (age).
- Once all data cleaning and editing had taken place, the dataset was reweighted to compensate for any differences between the target sample and the achieved sample of the project. The unweighted bases are provided throughout this report.

Please note:

- Responses from under 16s have been removed throughout the report unless otherwise specified. Tables which include respondents aged under 16 can be found in the Appendix.
- Figures throughout the report may not add up to 100% due to rounding.

2

Passenger Characteristics

Passenger Characteristics: Gender

Women are more likely (57%) to be day bus passengers than men (43%). Meanwhile, almost two-thirds of night bus passengers are men (64%) - compared to just one third of night bus passengers who are women (36%).

Gender – Day Bus Passengers

%

Gender – Night Bus Passengers

%

Passenger Characteristics: Gender Comparison with Londoners

Female day bus passengers make up 57% of the passengers surveyed compared with a London percentage of 51%. In contrast, night passengers are far more likely to be male (64%) than the general London population (49%).

Gender – Comparison between Day and Night Bus Passengers and Londoners

%

Passenger Characteristics: Age

With regards to day bus users, the largest segment is 25-34 year olds (26%), followed by 35-44 year olds (19%). The largest segment of night bus users is 25-34 year olds (38%) followed by 20-24 year olds (24%).

Age – Day and Night Bus Passengers

Q1. Which age group are you in?
Unweighted base: 38,825 Day; 9,329 Night
Note: Figures under 0.5% are not shown

Transport
for London

Bus User Survey 2014

Passenger Characteristics: Age Comparison with Londoners

Broadly speaking, the profile of bus passengers is more closely matched to the London population on day buses compared to night buses. However, bus passengers are more likely to be aged 18-34 than the London population, particularly on night buses.

Age – Comparison between Day and Night Bus Passengers and Londoners

%

TNS
 Q1. Which age group are you in?
 Unweighted base: 38,825 Day; 9,329 Night
 *London figures based on the 2011 Census
 Note: Figures under 0.5% are not shown

Passenger Characteristics: Gender by Age Group

Among day bus passengers, the proportion of male to female passengers is fairly consistent across the age range. On night bus services, the gender gap is greater among passengers aged 25 to 64 than among other age groups.

Gender by Age Group – Day Bus Passengers

Gender by Age Group – Night Bus Passengers

Passenger Characteristics: Employment Status

Over half of day and night bus passengers work full-time (51% and 59% respectively). While night bus passengers (59%) are more likely to work full-time than day bus passengers (51%), day bus passengers are more likely (9%) to be retired than night bus passengers (1%).

Employment Status – Day and Night Bus Passengers

%

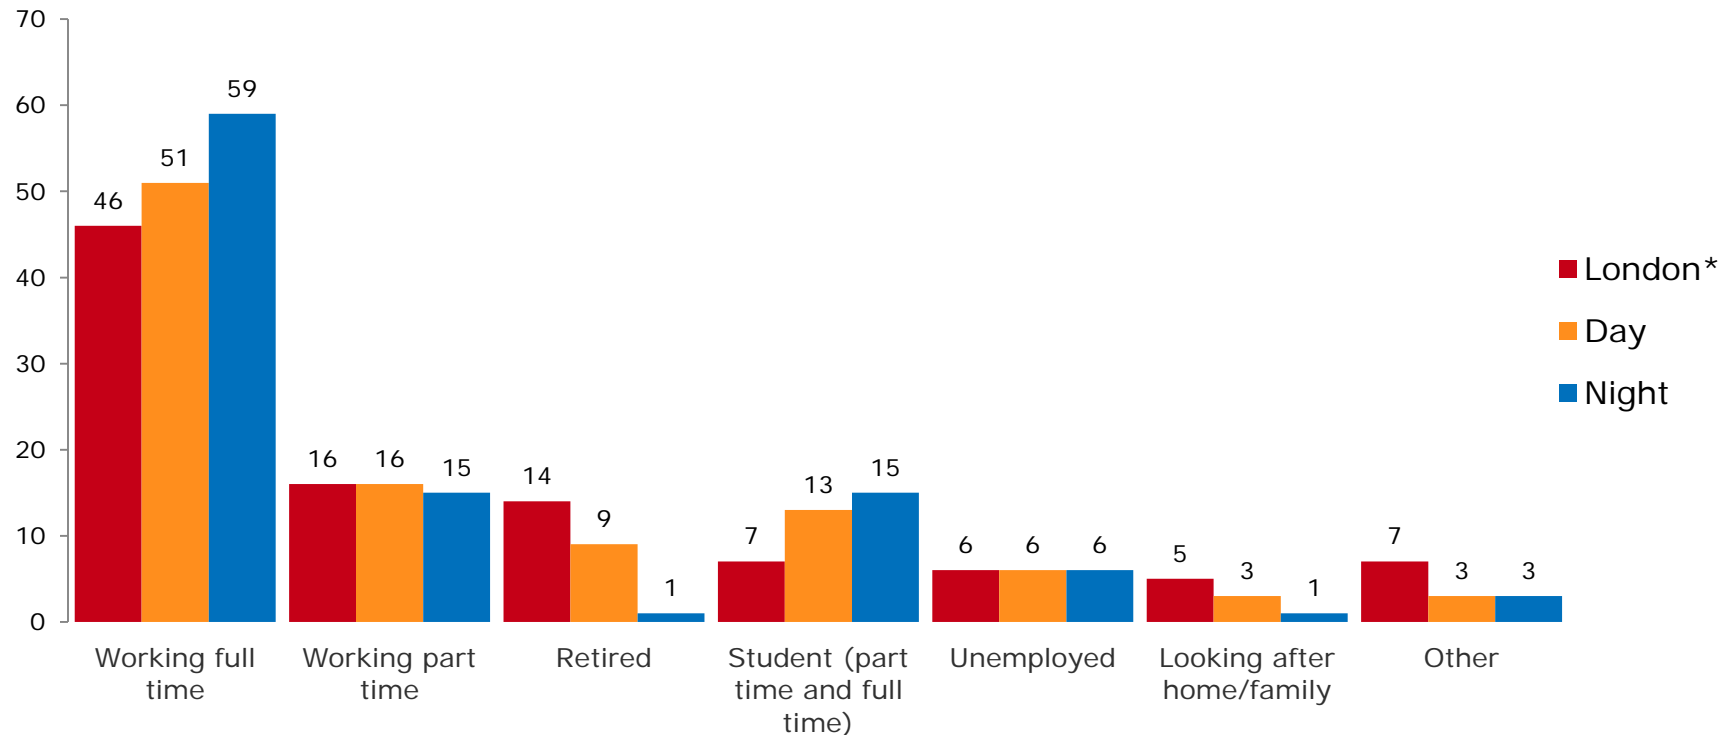

Passenger Characteristics: Employment Status Comparison with Londoners

Compared to the London population in general, people in full time work and students are over-represented on bus services, particularly night buses. In contrast, people who are retired and looking after home or family are under-represented, especially on night buses.

Employment Status – Comparison between Day and Night Bus Passengers and Londoners

**Transport
for London**

Bus User Survey 2014

Passenger Characteristics: Annual Household Income

Passengers on night bus services are more likely to have an annual household income of less than £20,000 (57%) than on day bus services (50%). Meanwhile, day bus passengers are more likely to have an annual income of over £30,000 (33%) in comparison to night bus passengers (26%).

Annual Household Income – Day and Night Bus Passengers

Q17. Please could you indicate which of the following bands your annual household income falls into, before tax and other deductions?
Unweighted base: 26,562 Day; 6,643 Night

Transport
for London

Bus User Survey 2014

Passenger Characteristics: Residence

The vast majority of both day (86%) and night (87%) bus passengers live within the M25. Day bus passengers are slightly more likely (9%) to live outside the M25 but within the South East than night bus passengers (6%).

Residence – Day and Night Bus Passengers

%

Q10. Where do you live?
Unweighted base: 29,886 Day; 7,270 Night

Transport
for London

Bus User Survey 2014

Passenger Characteristics: Ethnicity

The majority of bus passengers are white, but day bus passengers are more likely (32%) to be White British / Irish than night bus passengers (21%), while night bus passengers are more likely (34%) to be White Other compared to day bus passengers (21%).

Ethnicity – Day and Night Bus Passengers

Q15. Which of these do you consider to be your ethnic group?
Unweighted base: 32,944 Day; 7,759 Night

Passenger Characteristics: Ethnicity (Grouped)

White is the major ethnic group among bus passengers. When comparing day and night bus services, day buses have a slightly higher proportion of Black (20%) passengers than night buses (17%), while passengers on night buses are more likely (12%) to be of other ethnic group than on day buses (9%).

Ethnicity (Grouped) – Day and Night Bus Passengers

%

Passenger Characteristics: Ethnicity (Grouped) Comparison With Londoners

Although the largest segment, the proportion of bus passengers who are White is around 10 percentage points lower than among the London population in general. Asian bus passengers are also slightly under-represented. Conversely the proportion of Black or other ethnic group passengers is higher than that of Londoners in general.

Ethnicity (Grouped) – Comparison between Day and Night Bus Passengers and Londoners

%
%

Passenger Characteristics: Disabilities

The vast majority of day and night bus passengers are not disabled (90% and 92% respectively). Mobility impairments (2%) and age related mobility difficulties (2%) were among the most mentioned disabilities by day bus passengers.

Disabilities – Day and Night Bus Passengers

%

Passenger Characteristics: Disabilities Comparison with Londoners

Around 17% of Londoners say their day-to-day activities are limited in some way (8% a lot, 9% a little). In comparison, 10% of day bus passengers and 8% of night bus passengers have a disability that limits their daily activities*.

Disabilities – Londoners

%

Disabilities – Day and Night Bus Passengers

%

Passenger Characteristics: Wheelchair Users

On both day and night buses, 2% of bus passengers have used a wheelchair when travelling in London in the past 12 months.

Wheelchair Users – Day Bus Passengers

%

Wheelchair Users – Night Bus Passengers

%

Passenger Characteristics: Wheelchair Usage on Journey

On day bus services 0.2% of passengers used a wheelchair on their journey, and 0.3% of passengers on night bus services.

Journey Wheelchair Users – Day Bus Passengers

0.3%

Passenger Characteristics: Baby Buggy, Pushchair or Pram Usage on Journey

Around 4% of passengers travelled with an unfolded or folded baby buggy, pushchair or pram during the day.

Travelling with a Baby Buggy / Pushchair / Pram on Journey – Day and Night Bus Passengers %

3

Journey Characteristics

Journey Characteristics: Main Purpose of Journey

Travelling to/from work was the most common reason for passenger journeys on both day and night bus services (52% & 51% respectively). The second most common reason was to/from shopping among day bus passengers (11%) and leisure among night bus passengers (18%).

Main Purpose of Journey – Day and Night Bus Passengers

Journey Characteristics: Main Journey Purpose by Gender (Day Passengers only)

On day bus services, the most common journey purpose among bus passengers was travelling to/from work. However, female bus passengers were more likely (13%) to have taken the bus to/from shopping compared to male passengers (8%).

Main Journey Purpose by Gender – Day Bus Passengers

*On day bus services, 57% of passengers are female and 43% are male

Journey Characteristics: Main Journey Purpose by Gender (Night Passengers only)

On night bus services, the most common journey purpose among night bus passengers was travelling to / from work. However, female bus passengers were more likely (23%) to use a night bus for leisure compared to male passengers (16%).

Main Journey Purpose by Gender – Night Bus Passengers

*On night bus services, 64% of passengers are male and 36% are female

Q2. What is the main purpose of your journey? Q3. Are you...?
 Unweighted base: 8,386 Night
 Note: Figures under 0.5% are not shown ('Healthcare Appointment' and 'Taking/collecting child' were removed)

Transport for London

Journey Characteristics: Main Journey Purpose by Age (Grouped)

On day bus services, passengers aged 16-19 were the most likely (37%) to use a bus to/from school or education and passengers aged 60+ were the most likely (33%) to use a bus to/from shopping. On night bus services, the majority aged 20-34 and 35-59 used the bus to travel to/from work. In comparison to other age groups, 16-19 year olds were the most likely to use a night bus to visit friends/relatives (20%) and for leisure (19%).

Transport for London

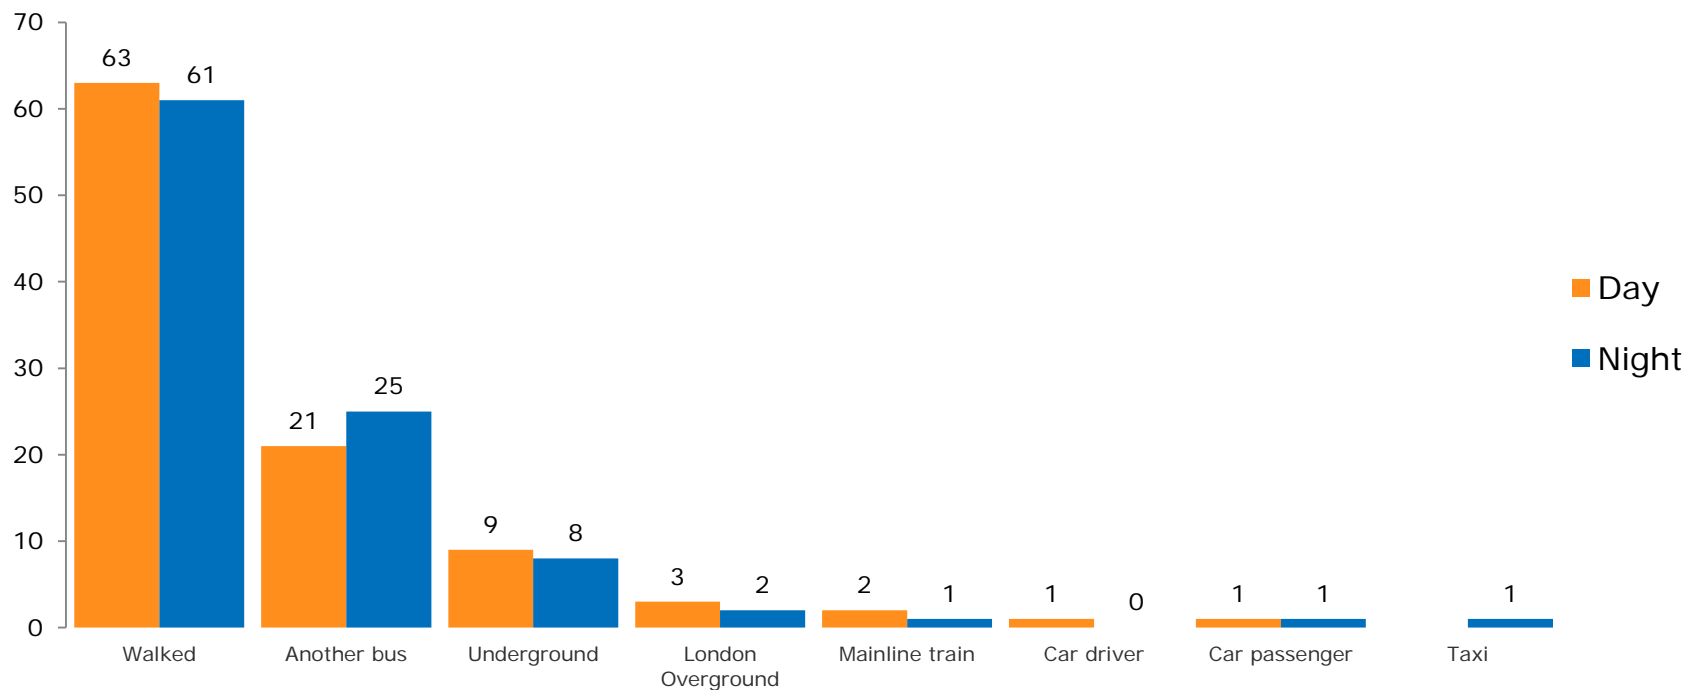

Bus User Survey 2014

Journey Characteristics: Access Mode

The majority of day (63%) and night (61%) bus passengers accessed the bus by walking all the way from their origin. Night bus users were slightly more likely (25%) to use another bus as their method of access compared to day bus passengers (21%).

How Passengers Travelled to the Bus Stop – Day and Night Bus Passengers

%

Q8a. How did you get to the bus stop where you got on the bus?
Unweighted base: 34,690 Day; 8,123 Night
Note: Figures under 0.5% are not shown (Tramlink, Bicycle, Motorcycle, DLR, Emirates Air Line were removed)

Transport for London

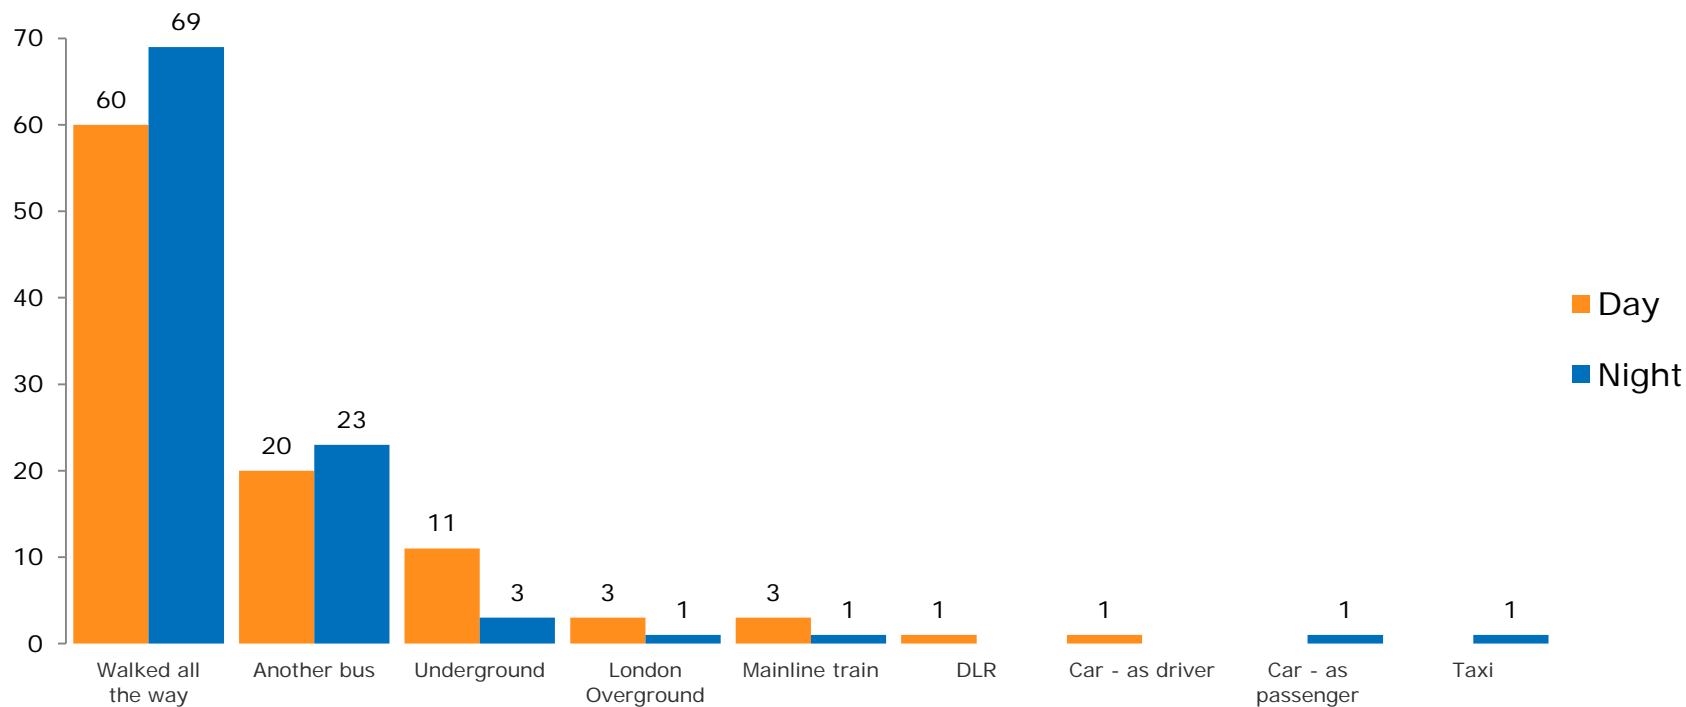

Bus User Survey 2014

Journey Characteristics: Egress mode

Night bus passengers were more likely to walk (69%) and use another bus (23%) to reach their destination than day bus passengers (60% and 20% respectively). However, day bus passengers were more likely (11%) to use the Underground to continue their journey compared to night bus passengers (3%).

How Passengers Travelled after the Bus Journey – Day and Night Bus Passengers

Q8b. How will you travel onwards after you leave this bus?
Unweighted base: 21,314 Day; 5,113 Night
Note: Figures under 0.5% are not shown (Bicycle, Tramlink, Motorcycle and Emirates Airline were removed)

4

Travel Behaviour

Travel Behaviour: Frequency of Use of the Bus Route

Almost half of day bus passengers (49%) and two in five of night bus passengers (40%) use the bus route they were surveyed on five or more days a week.

Frequency of Use: The Bus Route – Day and Night Bus Passengers

%

Travel Behaviour: Frequency of Use of Any London Bus

Over half of day (56%) and night (55%) bus passengers use any London bus five or more days a week.

Frequency of Use: Any London Bus Frequency – Day and Night Bus Passengers

%

Travel Behaviour: Frequency of Use of Any London Night Bus

Night bus users passengers are more likely to be heavy users (five or more days a week) of London night buses than day bus passengers (28% c.f. 10%). In fact, over half of day bus passengers (52%) use a London night bus less often than once a month.

Frequency of Use: Any London Night Bus Frequency – Day and Night Bus Passengers

%

Travel Behaviour: Frequency of Use of Underground / Docklands Light Railway

Night bus passengers are more frequent users of the Underground or Docklands Light Railway than day passengers (44% c.f. 33%). The proportion of passengers who have not used the Underground or Docklands Light Railway in the last three months is higher for day bus passengers (14%) than night bus passengers (10%).

Usage of Other Transport Links: Underground / Docklands Light Railway – Day and Night Bus Passengers

Travel Behaviour: Frequency of Use of Mainline Train

Almost one in five day and night bus passengers are frequent (five or more days per week) users of mainline trains. Meanwhile, 21% and 23% of day and night bus passengers respectively have not used a mainline train in the past three months.

Usage of Other Transport Links: Mainline train – Day and Night Bus Passengers

%

Travel Behaviour: Frequency of Use of Car / Van

Over a third of day bus passengers (35%) and almost half of night bus passengers (46%) have not used a car or van in the last three months. Just 12% of day bus passengers and 9% of night bus passengers are frequent (five or more days per week) car or van users.

Usage of Other Transport Links: Car / Van – Day and Night Bus Passengers

%

Travel Behaviour: Access to a Car Which Could Have Been Used for the Journey

The proportion of day bus passengers who have access to a car which they could have used for their journey instead of a bus is 21%. In comparison, night bus passengers are less likely (13%) to have had access to a car.

Access to a Car for the Journey – Day Bus Passengers

%

Access to a Car for the Journey – Night Bus Passengers

%

Travel Behaviour: Access to a Car Which Could Have Been Used for the Journey by Occupation of Household Chief Income Earner

Bus passengers who live in a household where the chief income earner is in a managerial position are more likely than other passengers to have access to a car.

Access to a Car for the Journey by Occupation of Household Chief Income Earner – Day and Night Bus Passengers

Weekend Night Passenger and Journey Characteristics

(Friday & Saturday users only)

Weekend Night Passenger and Journey Characteristics: Introduction

Definitions:

- Weekend night passengers are those who travel on a night bus on Friday / Saturday and Saturday / Sunday.

Background:

- Transport for London announced in September 2014 that 24-hour 'Night Tube' services at weekends will begin operation from the early hours of 12 September 2015, transforming night time journeys across London for millions of people.
- With the tube service set to run 24 hours from 2015, the purpose of this section to profile users of night buses on Friday / Saturday and Saturday / Sunday only.

Contents:

- Passenger Characteristics
- Journey Characteristics
- Ticket Information

Weekend Night Passenger Characteristics: Gender

The majority of night bus passengers travelling at the weekend are male (58%).

Gender – Weekend Night Bus Passengers (Friday/Saturday & Saturday/Sunday only)

%

Weekend Night Passenger Characteristics: Gender Comparison with Londoners

Female weekend night bus passengers make up 42% of the passengers surveyed compared with a London percentage of 51%. In contrast, weekend night bus passengers are more likely to be male (58%) than the general London population (49%).

Gender – Comparison between Weekend Night Bus Passengers and Londoners (Friday/Saturday & Saturday/Sunday only)

%

Weekend Night Passenger Characteristics: Age

Around two thirds of weekend night bus passengers are aged between 20 and 34.

Age – Weekend Night Bus Passengers (Friday/Saturday & Saturday/Sunday only)

Weekend Night Passenger Characteristics: Age Comparison with Londoners

Compared to the London population in general, those aged between 18 and 34 are over-represented among weekend night bus passengers, while those aged over 35 are under-represented.

Age – Weekend Night Bus Passengers (Friday/Saturday & Saturday/Sunday only)

%

Weekend Night Passenger Characteristics: Gender by Age

Among weekend night bus passengers aged 16-19, the gender split is fairly even. However, weekend night bus passengers aged over 35 are more likely to be male.

Gender by Age Group – Weekend Night Bus Passengers (Friday/Saturday & Saturday/Sunday only)

%

Weekend Night Passenger Characteristics: Annual Household Income

On weekend night bus services, passengers most commonly have an annual household income of up to £10,000, with one in five classifying themselves in this category (21%).

Bus User Survey 2014

Weekend Night Journey Characteristics: Access Mode

The majority of weekend night bus passengers (62%) accessed the bus by walking all the way from their origin, while 22% used another bus.

How Passengers Travelled to the Bus Stop – Weekend Night Bus Passengers (Friday/Saturday & Saturday/Sunday only)

Weekend Night Journey Characteristics: Egress Mode

Over two thirds of weekend night bus passengers (71%) walked all the way after alighting the bus to reach their destination, while 21% used another bus to complete their journey.

How Passengers Travelled after the Bus Journey – Weekend Night Bus Passengers (Friday/Saturday & Saturday/Sunday only)

Weekend Night Ticket Information: Ticket Type

The types of tickets used on weekend night bus services largely reflect the overall trend with Oyster pay as you go (39%) and Oyster Travelcard (38%) the most common tickets used.

Ticket Type – Weekend Night Bus Passengers (Friday/Saturday & Saturday/Sunday only)

Appendix 2: Visitor Analysis

Overview Visitor Analysis

Definitions:

- Visitors are defined as passengers living outside of London but excluding those who commute to their regular place of work or study.
- Of visitors, domestic visitors are those who live outside of London but within the UK and international visitors are those who live overseas or abroad.
- All other passengers are defined as non-visitors.

Please note:

- Responses from under 16s have been removed throughout the report unless otherwise specified. Tables which include respondents aged under 16 can be found in the Appendix.
- Figures throughout the report may not add up to 100% due to rounding.

Bus User Survey 2014

Appendix 3: Passenger Characteristics (Including under 16s)

Overview Passenger Characteristics (Including under 16s)

Please note:

- This section analyses passenger characteristics (age only) which includes data from passengers under the age of 16.
- The data is not comparable to the analysis in the main body of the report.

Passenger Characteristics: Age (Including under 16s)

The full passenger profile including under 16s can be seen in the chart below. Under 16s account for 10% of day bus passengers but only 2% of night bus passengers.

Age – Day and Night Bus Passengers

(Including passengers aged under 16)

%

Passenger Characteristics: Age (Grouped, Including under 16s)

Passengers aged under 16 are under-represented among bus passengers, particularly on night bus services. When including the under 16s, the largest segment of day and night bus users is 25-34 year olds (24% and 37% respectively).

Age – Day and Night Bus Passengers

(Including passengers aged under 16)

%

Weekend Night Travel Behaviour: Age (Including under 16s)

Under 16s account for only 2% of weekend night bus passengers, and so do not significantly alter the age profile. Over three quarters of weekend night bus passengers are aged between 20 and 44.

Age – Weekend Night Bus Passengers (Friday/Saturday & Saturday/Sunday only) (Including passengers aged under 16)

%

10

Appendix 4: Comparison of the Bus User Survey 2008 and 2014

Comparison of the Bus User Survey 2008 and 2014

Please Note:

- **2014 survey does not include under 16's except to record their age. In order to provide a direct comparison with the previous Bus User Survey, under 16's have been removed from the analysis of 2008 data (except for the comparison of age)**
- New questions that were added to the 2014 are Wheelchair Usage on Journey, Baby Buggy / Pushchair / Pram Usage on Journey and Household Income.
- 2008 had open "other" responses and recodes for Journey Purpose, Employment Status, Ticket Type, Access Mode, Egress Mode, Disability, Ethnicity and Household Chief Income Earner Occupation.
- 2014 only had open "other" response for Household Chief Income Earner Occupation and therefore did not have recoding for Journey Purpose, Employment Status, Ticket Type, Access Mode, Egress Mode , Disability, Ethnicity.

Contents:

Headlines

Overall the **2014 BUS** findings are **broadly consistent** with the **2008 BUS** findings.

However there are **some differences**, the main ones being:

- The **adult bus profile is older** in 2014 (fewer 16-34, more over 35's)
- The proportion of journeys using **Oyster Travelcard** and **Oyster PAYG increased** in 2014

More minor differences include:

- Women still outnumber men on day bus and men still outnumber woman on night bus, but the proportion of women has increased on both day and night buses.
- There are fewer passengers from mixed ethnic groups and more from black ethnic groups
- The vast majority of bus passengers are still Londoners but the proportion of non-Londoners has increased slightly
- The proportion of disabled users has slightly increased
- There is a slight decrease in access to car/van for journey

The age profile of adult bus passengers has got **older** (fewer 16-34, more over 35's). The proportion of under 16s has also increased.

Age

%

Q1. Which age group are you in?
 Unweighted base: 42,960 Day 2014; 47,254 Day 2008; 9,508 Night 2014; 8,691 Night 2008
 Note: Figures under 0.5% are not shown on the bar chart

Transport for London

The proportion of **women** has **increased** on both day and night buses.

Gender

%

Ethnicity is broadly similar between 2008 and 2014, although there are **fewer** people from **mixed** ethnic groups and **more** from **black** ethnic groups.

Ethnicity (Grouped)

%

Q15. Which of these do you consider to be your ethnic group?
 Unweighted base: 33,944 Day 2014; 37,378 Day 2008; 7,759 Night 2014; 7,363 Night 2008

Transport for London

The proportion of **non-Londoners** has **increased** slightly.

Residence

%

Q10. Where do you live?
Unweighted base: 29,886 Day 2014; 37,119 Day 2008; 7,270 Night 2014; 7,369 Night 2008

Transport
for London

Employment status has remained **fairly consistent** for **day** bus passengers, while **night** bus passengers have seen an **increase** in **workers** and a **decrease** in **students**.

Employment Status

The proportion of bus passengers with a **disability** has **increased** slightly.

Disabilities %

Q11. Do you have any long term physical or mental disability which limits your daily activities or the work you can do, including issues due to old age?

Unweighted base: 32,503 Day 2014; 34,255 Day 2008; 7,749 Night 2014; 6,912 Night 2008,

Q12. Have you used a wheelchair when travelling in London in the past 12 months??

Unweighted base: 31,683 Day 2014; 34,051 Day 2008; 7,527 Night 2014; 6,859 Night 2008

Transport for London

Bus passengers main journey purpose is broadly in line with 2008, with some small differences (fewer travelling to/from work during the day, more at night; fewer leisure travellers at night).

Main Purpose of Journey

Q2. What is the main purpose of your journey?

Unweighted base: 37,233 Day 2014; 43,472 Day 2008; 8,901 Night 2014; 8,587 Night 2008

Note: Figures under 0.5% are not shown (Healthcare Appointment & Taking/collecting child have been removed for night bus)

Transport for London

For day bus, **Oyster Travelcard** and **PAYG** were more common ticket types in 2014.

Type of Ticket – Day Bus Passengers

%

Q5. What kind of ticket do you have for this journey?
Unweighted base: 37,123 Day 2014; 39,761 Day 2008

* London Buses stopped accepting cash fares from the 6th July 2014

Please note: Changes to ticket types between 2008 and 2014. "16+ Zip Oyster card" code was added in 2014, while "Saver Ticket", "One Day Bus Pass", "Free under 11/11-15", "Free/discount 16/17" and "Discount 18+" codes have been removed.

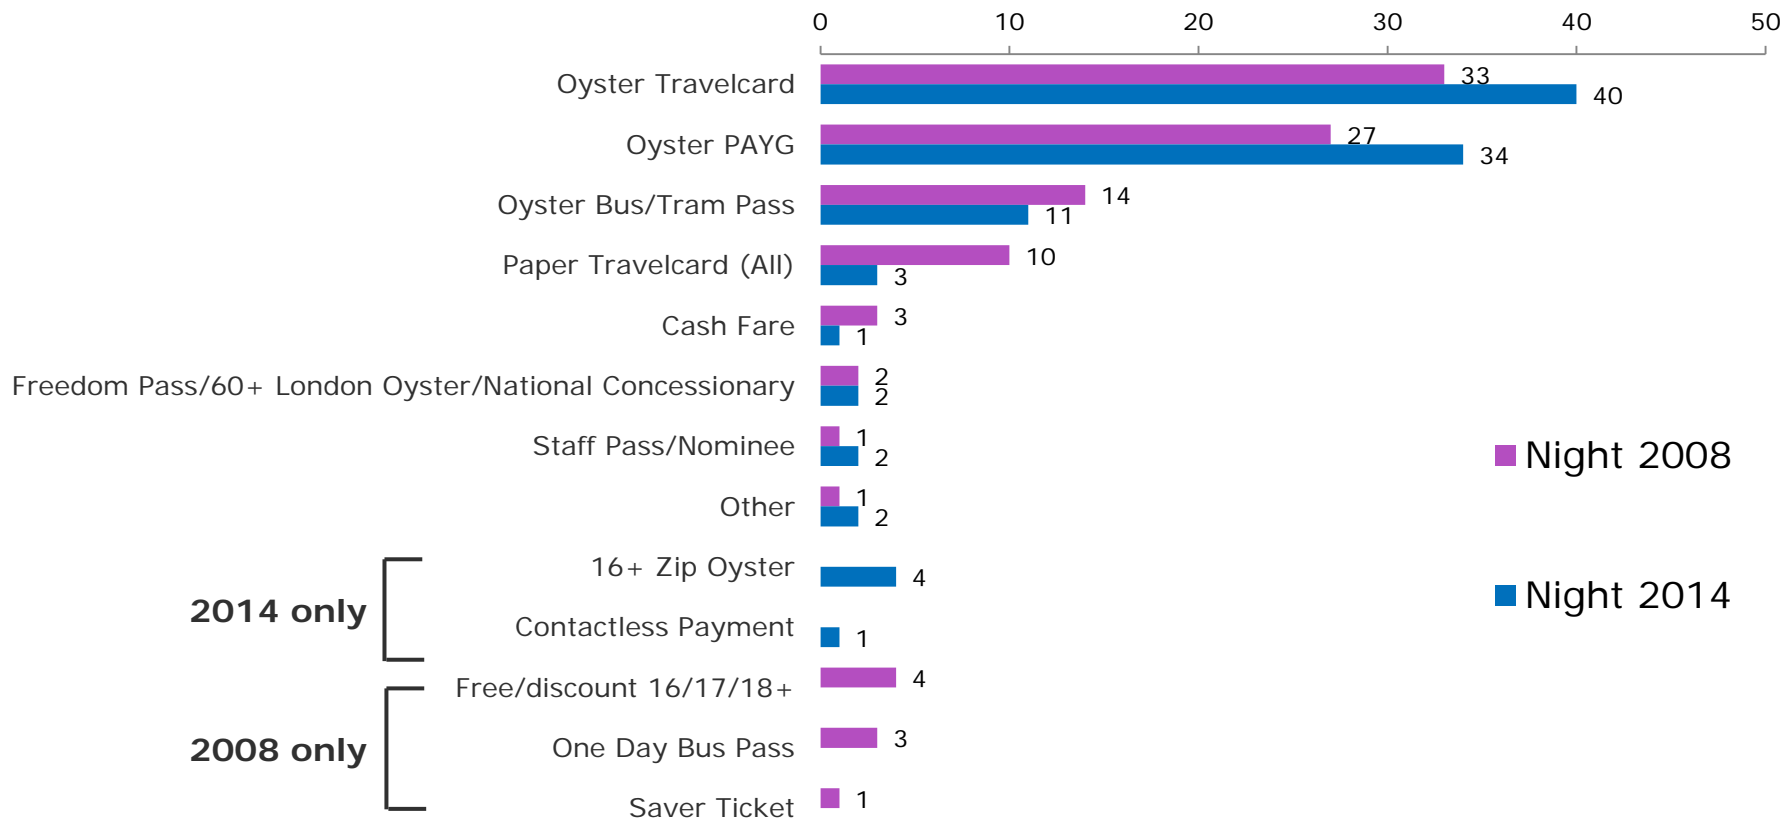

Transport for London

Similarly to day buses, **Oyster Travelcard** and **PAYG** were far more common ticket types on night buses in 2014.
