London Underground (Northern Line Extension) Order

Environmental statement

Volume 2c

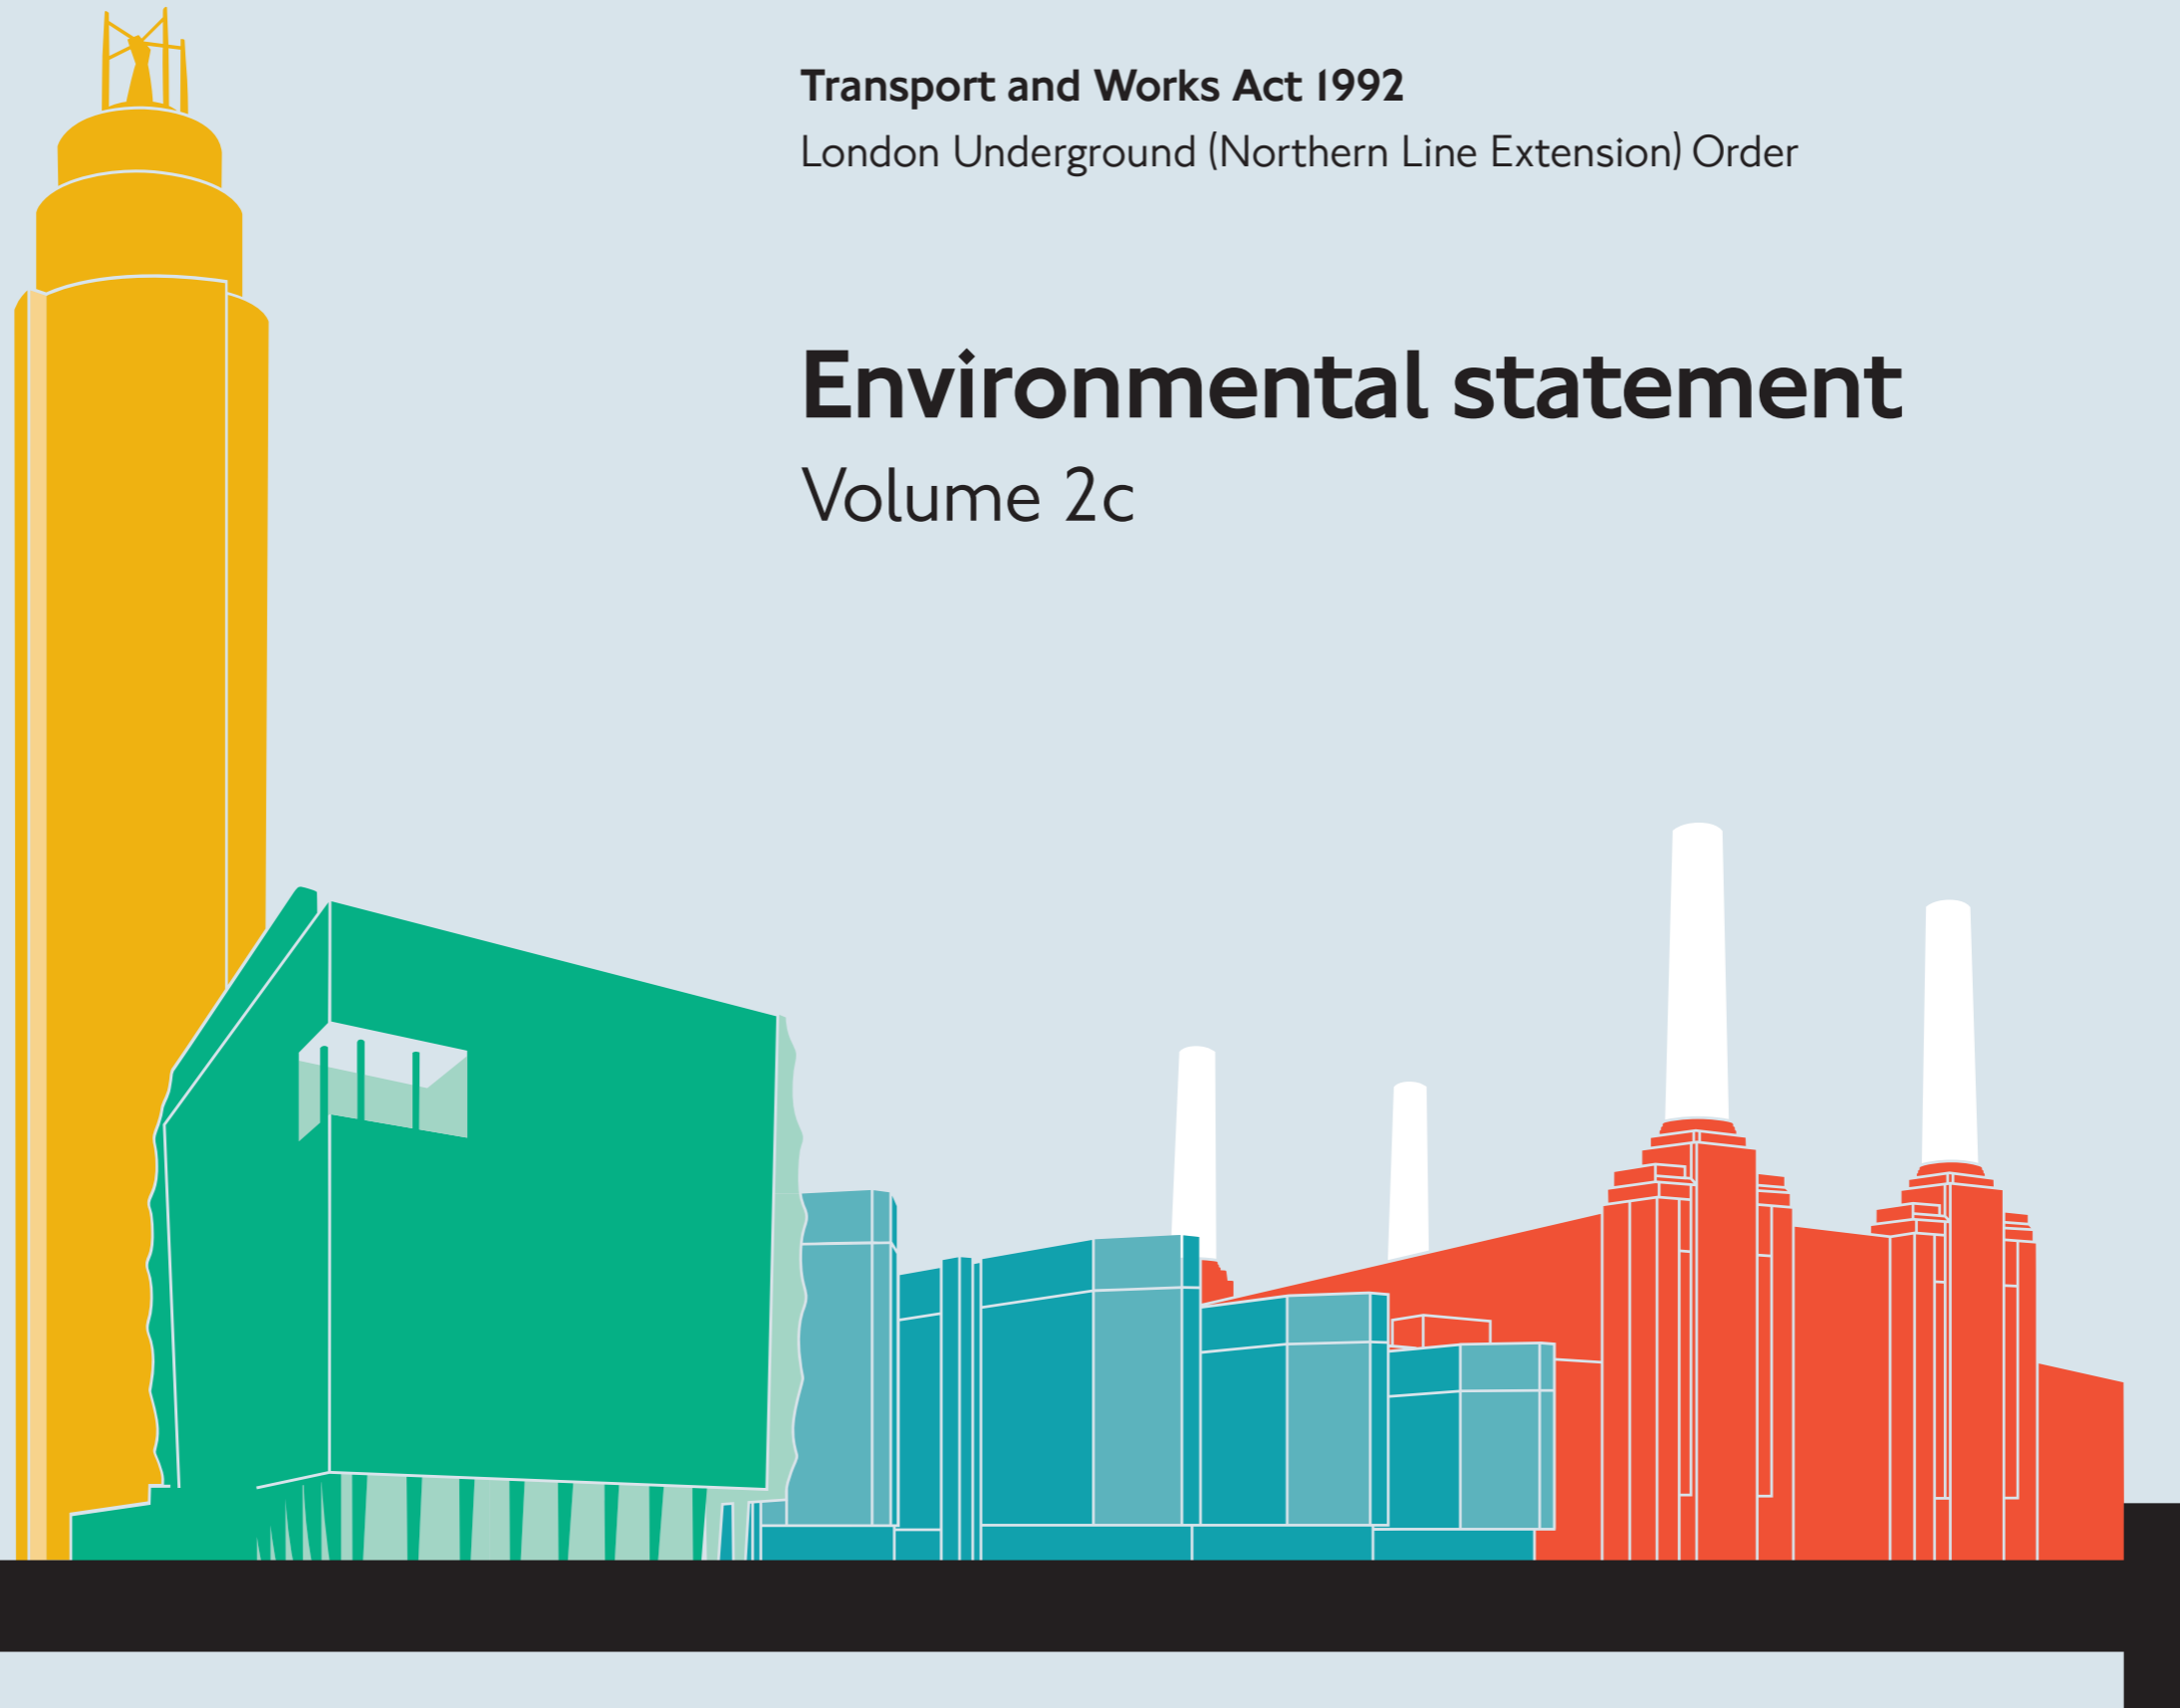

Table of Contents

Environmental Statement Volume Ila

- Appendix A Scoping and EIA Consultation
 - A1 May 2011 Scoping Report
 - A2 May 2011 Scoping Response
 - A3 Strategy for Cumulative Impact Assessment
- Appendix B NLE Materials Management Strategy
- Appendix D Archaeology and Built Heritage
- Appendix E Noise and Vibration
 - E1 Baseline Noise Survey Report
 - E2 Construction Noise and Vibration Prediction Report
 - E3 Ventilation Shaft and Station Noise and Vibration Prediction Report
 - E4 Groundborne Noise and Vibration Prediction Report
- Appendix F Air Quality
- Appendix G Electromagnetic Compatibility
- Appendix H Surface Water and Flood Risk
 - H1 Buro Happold Flood Risk Assessment
 - H2 Water Framework Directive Report

Environmental Statement Volume I Ib

- Appendix C Traffic and Transport
 - C1 Construction Traffic, Parking & Pedestrian Impact Assessment
 - C2 Existing Pedestrian Conditions
 - C3 Northern Line Stations PEDS Analysis
 - C4 Legion Modelling Report on Kennington Station
 - C5 Static Station Assessment: Battersea Park

Environmental Statement Volume I Ic

- Appendix I Land Quality and Groundwater
 - I1 Landmark Envirocheck Report
 - I2 Halcrow Ground Settlement Report
 - I3 Concept Consultants Ltd Site Investigation
 - I4 Bomb Damage Maps

- I5 Buro Happold Battersea Redevelopment Geoenvironmental Interpretive Summary Report

Environmental Statement Volume I Id

- Appendix J Ecology and Trees
 - J1 Phase 1 Habitat Reports
 - J2 TfL Arboricultural Survey
 - J3 Winter Bird Survey
 - J4 LPWG Site Visit Report
 - J5 Applied Ecology Winter Birds Survey
 - J6 Peregrine Falcon and Black Redstart Management Strategy
 - J7 Applied Ecology Battersea Baseline Report
- Appendix K Townscape and Visual Amentiy
 - K1 Methodology for Producing Visually Verified Photomontages
 - K2 Schedule of Visual Receptor and Predicted Impacts
 - K3 Representative Views Analysis
- Appendix L Climate Change Calculations and Assumptions
- Appendix N Code of Construction Practice and Construction Noise Mitigation
 - N1 TfL Code of Construction Practice
 - N2 Construction Noise and Vibration Mitigation Scheme
- Appendix O Energy and Sustainability
 - O1 Outline Energy Strategy
 - O2 Project Sustainability Appraisal Report

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.

In the attached datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Middlesex
Published 1874 - 1880
Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Middlesex
Published 1896
Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

10K Raster Mapping
Published 1999
Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 colour raster mapping. These maps are derived from Landplan which replaced the old 1:10,000 maps originally published in 1970. The data is highly detailed showing buildings, fences and field boundaries as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information depicts county, unitary authority, district, civil parish and constituency.

Russian Maps
A Landmark service

London
Published 1985
Source map scale - 1:25,000

These maps were produced by the Russian military during the Cold War between 1950 and 1997, and cover 103 towns and cities throughout the U.K. The maps are produced at 1:25,000, 1:10,000 and 1:5,000 scale, and show detailed land use, with colour-coded areas for development, green areas, and non-developed areas. Buildings are coloured black and important building uses (such as hospitals, post offices, factories etc.) are numbered, with a numbered key describing their use. They were produced by the Russians for the benefit of navigation, as well as strategic military sites and transport hubs, for use if they were to have invaded the U.K. The detailed information provided indicates that the areas were surveyed using land-based personnel, on the ground, in the cities that are mapped.

A Landmark Information Group Service v29.0 04-Jul-2008 Page 4 of 7

London
Published 1874
Source map scale - 1:1,056

The 1:1056 scale of Ordnance Survey mapping was adopted from Ireland in 1848 and was used to survey towns with a population of over 4000, plus county towns of lesser population, in those counties mapped at the six-inch scale in 1841-55. The scale was the largest scale at which London was mapped by the Ordnance Survey and a 'selector' survey of the capital, showing little more than streets, street names, frontages and altitudes, was undertaken between 1848 and 1850. The majority of the 1:1056 surveys were later replaced by 1:500 surveys, although almost all the remainder were revised at this scale, sometimes more than once before 1895. The type of detail shown on the 1:1056 scale is broadly similar to that on 1:500; the apparent omission of minor details such as sewer access points and street lights may be as much a reflection of the generally earlier date of these plans, as of the specification of the map.

Please note: Due to the partial coverage of Historical Town Plans, it is possible that not all segments within an order will contain mapping. Only the segments that have Town Plan coverage will be generated.

London
Published 1850
Source map scale - 1:5,180

The historical town plans shown derive from Ordnance Survey mapping from the early to mid 1850s. The 1:2500 scale was introduced in the early 1850s, to survey districts covered by the Local Boards of Health and for a map of the Osborne Estate of Queen Victoria. The general style is similar to that of the early 1:2500s published shortly afterwards. 1:5280 scale was surveyed shortly afterwards in the mid 1850s as general purpose mapping with a standard of content similar to the more contemporary 1:10,560 mapping. The scale was also used for a reduction of the 1:1056 'skeleton survey' of London that was undertaken between 1848 and 1850.

Please note: Due to the partial coverage of Historical Town Plans, it is possible that not all segments within an order will contain mapping. Only the segments that have Town Plan coverage will be generated.

Ordnance Survey Plan
Published 1:50 - 1:51
Source map scale - 1:1,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1940s. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1898 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1918, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Supply of unpublished Survey Information
 Published 1873 - 1874
 Source map scale - 1:1,500

Supply of unpublished Survey Information were produced between 1872 and 1874, mainly for internal use at Ordnance Survey. These were more of a 'work-in-progress' plan as they showed updates of individual areas on a map. These maps were unpublished, and they do not represent a single moment in time. They were produced at both 1:2,500 and 1:1,250 scales.

Ordnance Survey Plan
Published 1:51
Source map scale - 1:1,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1940s. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1898 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1918, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Large-Scale National Grid Data
 Published 1983 - 1987
 Source map scale - 1:1,250

'Large Scale National Grid Data' superseded S1 cards. Ordnance Survey's 'Survey of Information on Microfilm' in 1992, and continued to be produced until 1999. These maps were the forerunners of digital mapping and so provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

1, Lauxhall Grove, London, SW8 1S

Ordnance Survey Plan
 Published 1:50 - 1:51
 Source map scale - 1:1,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1940s. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1898 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1918, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.
