

## ByBox – Secure drop boxes

With less than a year to go until the London 2012 Olympic and Paralympic Games, now is the time to plan and ensure your business will be able to operate effectively.

London will be packed with visitors during the Games, on top of the millions who live and work in the Capital. The Olympic Route Network will be in operation, meaning that some routes through London will be busier than usual.

If your business needs to move around London, or you rely on deliveries and freight, make sure you are prepared well in advance of next summer.

Drop boxes are deliveries made to a secure location for later collection. They are particularly useful for those who don't have fixed premises to accept deliveries (eg field engineers) or those who need to be flexible about when they pick up.

TNT Express uses drop boxes (provided by ByBox) in twenty locations around London, principally to provide mobile phone engineers with same-day or next-day delivery of parts for their customers.

For next day deliveries ByBox distributes overnight on TNT's behalf, meaning engineers can pick up the parts the next morning. For same-day deliveries ByBox gives TNT access to its boxes to deliver from its Vauxhall depot.

### Key features of ByBox drop boxes are:

- Overnight deliveries by 8am (out of Olympic Route Network hours)
- They are at around 60 locations across London
- Collections can be made at any time
- Boxes are kept in commercial premises (eg supermarkets and petrol stations)
- A barcode security system accurately tracks deliveries
- Boxes come in a range of sizes
