6. Most recent KPI table for Serco

The Service Provider (Serco) who service the scheme, are measured against a stringent performance indicator (PI) regime, which we adapt to improve the level of service provided.

Cycle availability has proved challenging as a new maintenance regime has been implemented with the intent of reducing the number of instances of cycles requiring further repairs. This had led to a slight backlog of cycles. However it is expected that new workshop practices will help to address the issue.
