

Road Network Challenges Map

Greater London

Quick Start Guide

This interactive map illustrates the location of some of the challenges on London's road network. These represent some of the issues that have been considered by the Roads Task Force in formulating their report entitled 'The vision and direction for London's streets and roads'.

Add Data Layers to the map by clicking an item in the legend on the right. Context layers can be added or removed by selecting items under the 'Contextual Data' heading in the bottom left corner of the page.

Add Data Themes (layers grouped by RTF-identified functions) by using the buttons on the left of the screen.

Additional Information about each data layer can be viewed by clicking the *i* icons.
